

ZESTRON® Bath Analyzer 20

Area of application for the ZESTRON® Bath Analyzer 20

In order to achieve consistent cleaning results, the user has to ensure that the actual concentration of the cleaning agent stays within the recommended application range. Various factors such as "drag-out," dilution and evaporation can potentially influence the actual concentration. Regular measurements of all process related parameters are therefore highly recommended. The ZESTRON® Bath Analyzer 20 is a simple, easy-to-use method that provides reliable and accurate concentration measurements for fresh as well as for contaminated cleaning baths.

Simple measurement in only a few steps:

① Sampling / Decanting

② Adding test solution

③ Shaking / Evaluating

Advantages of the ZESTRON® Bath Analyzer 20:

- Very precise concentration measurement:
 - even for increasing contamination levels
 - for fresh as well as for contaminated cleaning baths
- Simple and fast procedure
- Requires little space with minimal investment

Specifically developed for the following cleaning agents:

- VIGON® A 200 Neutral
- VIGON® SC 200
- VIGON® SC 202
- VIGON® SC 210
- VIGON® N 600
- VIGON® PM 105
- ZESTRON® VD 200

The ZESTRON® Bath Analyzer 20 Kit includes:

- 1) PE bottle with injection nozzle
- 2) 2 pairs of vinyl gloves
- 3) Digital thermometer (°C/°F)
- 4) Sampling beaker
- 5) Glass cylinder with marking
- 6) 6 x 100 mL ZESTRON® Bath Analyzer 20 test solution
- 7) User Manual, including correlation charts (not illustrated)

To place an order:

Part No.	Product Description
0415-0000	ZESTRON® Bath Analyzer 20 Portable case
0416-0100	ZESTRON® Bath Analyzer 20 6x 100 mL Refill bottles in carton
